Profile

I am a results-driven **Full Stack Developer** with hands-on real-time industry experience in building robust, scalable, and high-performance web applications. During my tenure at **Zaalima Development Pvt. Ltd.**, I played a key role in developing enterprise-grade solutions, including scalable real-time chat applications and comprehensive Library Management Systems. I care about writing clean, maintainable code and transforming complex business requirements into seamless, user-centric digital products. Whether it's optimizing database queries, building responsive front-end interfaces, or integrating secure back-end APIs, I approach every challenge with a problem-solving mindset and a passion for modern engineering standards.

Technical Skills

- **Programming & Languages:** Java, Python, JavaScript
- **Frontend & Development:** HTML5, CSS3, React.js, Tailwind CSS, TypeScript, Vercel
- **Backend & Development:** Node.js, Express.js, MongoDB, REST APIs, Socket.IO, SQL, Render
- **AI & Software Development:** ChatGPT, ClaudeAI, OpenAI API, Prompt Engineering, Postman
- **UI/UX Design:** Figma, Wireframing, Prototyping, User Flows, Design Systems, Responsive Design, UI Design, UX Design
- **Tools & Technologies:** Git, GitHub, Visual Studio Code, Docker, AWS

Soft Skills

- **Core Strengths:** Problem-Solving, Team Collaboration, Adaptability, Self-Learning

Experience

Full Stack Development Intern

Bengaluru

Zaalima Development Pvt. Ltd.

Real-Time WhatsApp Clone

- Developed a full-stack real-time messaging application with a WhatsApp-inspired user experience using **React.js, Node.js, Express.js, MongoDB, and Socket.IO**.
- Designed and implemented **user registration and login pages** with secure authentication using **JWT and bcrypt**.
- Implemented **real-time chat functionality** with automated responses, allowing users to receive instant replies without refreshing the page.
- Built **online/offline user status tracking**, profile viewing, profile details, and personal profile picture management.
- Added **message delivery/read indicators, blue-tick status, emoji support, and interactive chat features** for a realistic messaging experience.
- Developed a responsive and user-friendly chat interface with **user lists, conversation management, and dynamic message updates**.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, bcrypt, JavaScript, HTML, CSS

Library Management System

- Developed a full-stack library management application using **React.js, Node.js, Express.js, MongoDB, and Mongoose** to digitize and streamline library operations.
- Designed a responsive **admin dashboard** to monitor total books, available books, issued books, registered students, overdue books, and total fines.
- Implemented **book and student management** with features to add, view, update, and manage library records and student information.
- Built a complete **book issue and return management system** with student selection, book selection, issue date, due date, return tracking, and issue history.
- Developed a **fine management module** to track total, unpaid, and collected fines, including functionality to mark pending fines as paid.

- Implemented **category management and reporting features** to analyze library statistics, overdue books, most borrowed books, student activity, issue/return records, and fine status.
- Created a fully **responsive user interface** with organized navigation for Dashboard, Books, Students, Issue Book, Return Book, Fines, Categories, Reports, and Settings.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, JavaScript, HTML, CSS

Education

Bachelor's Degree in Computer Applications KGISL INSTITUTE OF TECHNOLOGY / BHARATHIAR UNIVERSITY CGPA: 8.5/10	2021 – 2024
--	-------------

Projects

E-Commerce Website

- Developed a **responsive front-end e-commerce website** using **HTML5, CSS3, and JavaScript**, featuring a modern and user-friendly interface for online product browsing and shopping.
- Implemented structured **navigation with Home, Shop, Blog, About, and Contact pages**, along with promotional banners, featured products, new arrivals, product cards, pricing, and shopping cart interactions.
- Designed **responsive layouts and reusable UI sections** to provide a consistent experience across desktop, tablet, and mobile devices.
- Added customer-focused sections such as **free shipping, online orders, promotions, newsletter subscription, customer support, account, wishlist, and order tracking**, creating a complete e-commerce-style user experience.
- **Tech Stack:** HTML5, CSS3, JavaScript
- **Live Project:** [\[E-Commerce Website\]](#) — **GitHub:** [\[GitHub\]](#)

Hotel Management System

- Developed a modern and responsive **hotel management system** using **HTML5, CSS3, JavaScript, and Tailwind CSS** to showcase hotel services, rooms, facilities, and booking-related information.
- Designed a clean and intuitive **navigation structure** with well-organized sections, allowing users to easily explore hotel information, services, rooms, facilities, and other important details.
- Created responsive **room and service sections** with structured layouts, visually appealing content, and clear call-to-action elements to provide a smooth and engaging user experience.
- Implemented **responsive web design** using CSS3 and Tailwind CSS to ensure consistent layouts and usability across desktop, tablet, and mobile screen sizes.
- Used **JavaScript** to add interactive functionality and improve user interactions throughout the website, making the interface more dynamic and user-friendly.
- Applied modern **HTML5 semantic structure** and organized CSS/Tailwind utility classes to create maintainable, readable, and well-structured web pages.
- Focused on creating a **user-friendly hotel information and booking experience**, providing easy access to room details, services, facilities, and important hotel information.
- **Tech Stack:** HTML5, CSS3, JavaScript, Tailwind CSS
- **Live Project:** [\[Hotel Management System\]](#)

Certifications

Full Stack Development Zaalima Development Pvt. Ltd.	2026
Certified Java Developer Professional Certification Score: 90/100 (90%) License: JDAC@230045CKD007921DC.kzP5531 <i>Lifetime Validity</i>	2025
Prompt Engineering AI & Development Course	2025 – 2026
Certified SQL Database Management	2026
Trained AWS Amazon Web Services	2026
